

« Security is a matter of trust. With digital certificates, we increase the level of trust that your customers have in your e-business processes. »

Urs Fischer, CEO SwissSign AG

Security is a matter of course at SwissSign

WE KEEP YOU SAFE

E-business processes are today secured in a trusted manner. As a member of the «swiss made software» label, SwissSign guarantees high quality standards for digital identities and the provision of a sustainable service profile that is fit for the future and all further developments.

SwissSign offers trusted identities for servers and devices – SSL and device certificates – as well as for people, authorities and companies either as stand-alone products or Managed PKI Certificate Services. Other SwissSign offerings are Time Stamping and Signature Services.

Everything speaks in favour of SwissSign

SwissSign is **Swiss-made** – SwissSign develops all of its software in Switzerland. The «master key» for our certificates is stored safely at two Swiss banks.

SwissSign is **worthy of your trust** – SwissSign is a subsidiary of Swiss Post and we offer absolute discretion, reliability, security and stability with all of our products.

SwissSign is **prominent** – SwissSign certificates are already issued in more than 50 countries. They are automatically recognised by all major operating systems, browsers and mobile devices and are integrated in partner solutions.

SwissSign **goes the extra mile** – SwissSign is a Swiss company and we work to ensure reliability in everything we do – right down to the last detail. Our local team will support you in German, French and English.

SwissSign is **responsive** – SwissSign's Managed PKI Certificate Services are tailored to your individual needs. Our customers can acquire all of their certificates around the clock in a quick and simple manner via a web interface or on an automated basis via one of our partner solutions.
